

以下是在下對電動車充電站發展方案:

1. 便利店充電站:

與便利店合作，在路邊的分店安裝義電組件(可推動、防水)供電能車義電。車輛充電時，充電組件必須固定在路邊。

好處:

便利店的分店多而分佈廣可在較短時間大幅增加義電站的數目。

對便利店來說可增加有潛質的客戶。

不需向政府申請在路邊建設義電設備。

2. 流動充電站

在大形貨車上安裝義電組件，在沒有充電站設備的地方停泊如沙灘外、主題公園外。

3. 充電站資訊 apps

可以透過軟件公司或貴公司內部 IT 部人員編寫提供:

流動充電站、便利店充電站和現有的充電停車場的地圖資料，佔用情況，例如有否充電空位、快將完成的車輛剩餘充電時間。自己車輛大約到達下一個充電站的時間，和預約充電位置。

更可在 apps 中加設有關汽車用品或汽車品牌的廣告以增加收入。

The following is the development plan for electric vehicle charging stations:

1. Convenience store charging station:

In cooperation with convenience stores, install recharge components (which can be move and waterproofed) to supply electric vehicles to recharge at roadside branches.

The recharge component must be fix at the roadside during recharge the vehicles.

benefit:

Convenience stores have many branches and are widely distributed, which can significantly increase the number of power stations in a short period of time.

Potential customers can be added to convenience stores.

No need to apply to the government for the construction of righteous electrical equipment on the roadside.

2. Mobile charging station

Install electric components on large trucks, and park in places without charging station equipment, such as outside the beach and theme parks.

3. Charging station information apps

Can be written by software companies or your company's internal IT department to provide:

Map data of mobile charging stations, convenience store charging stations, and existing charging parking lots, such as occupancy conditions, such as whether there are charging vacancies and the remaining charging time of vehicles that will soon be completed. Your vehicle's approximate time to reach the next charging station, and reserve a charging location.

You can also add advertisements about car Accessories or car brands in your apps to increase your income.
